Zoomy is a digital microscope that can be hooked up to a computer, laptop, or interactive white board. With Zoomy, students have the chance to use a hands-on approach to exploring and using scientific inquiry. The microscope can focus and zoom in on objects up to 43x magnification. To get started, install the program using the CD provided onto a computer or laptop. Students can zoom in by turning the top half of Zoomy. Zoomy also has a button on top to take pictures of the object being observed. Zoomy can be used for presentation, digital portfolios and lab reports.

how to use Zoomy.

### Developmental Considerations

- Ages 3+
- Skills Required:
  - Digital Literacy
  - Dual Representation

### Objectives of Activity:

- Scientific Observation/Method
- Hands-on Investigation
- Inquiry
- Social Learning
  - Collaboration
