

Osmo Tangram

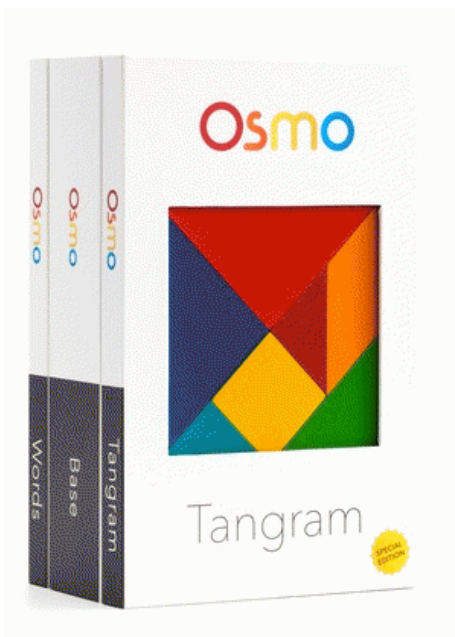

Photo courtesy of Osmo

Osmo Tangram bridges the real and digital realm by providing visual and audio feedback with each successfully done puzzle. Children challenge themselves and practice spatial thinking while matching the shapes seen on the iPad with the 7 wooden tangram pieces. Place the wooden pieces in front of the iPad. This allows the reflector to read the completed puzzle. There are multiple levels and more puzzles are unlocked with each victory.

What's Included

- 7 Wooden Pieces

Resources Required
