

## Osmo Numbers

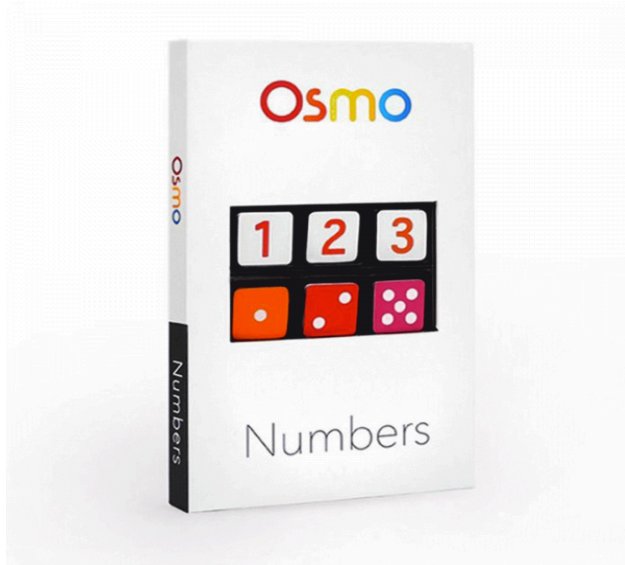

Photo courtesy of Osmo

Osmo Numbers provides children a hands-on opportunity to explore math concepts. Children are able to rearrange both number and dot tiles in under the reflector to experiment with addition, subtraction, and multiplication. The game provides real-time feedback and children are able to correct themselves without pressure.

The game is flexible and children work at their own pace. The object of the game is to fill up the tank with water. Water fills up each time an answer is correct. Collect fun fish along the way. There are 90 fish and multiple modes to play in.

### What's Included

- 20 Number Tiles
- 20 Dotted Tiles

### Resources Required

- Osmo Gaming System (Available at TEC Center)
- Compatible iPad:
  - iPad 2,3,4
